The Model NBS 1001 Continuous Band Sealer is designed for performance and reliability in the harshest of environments. Built for multiple shift operations with minimal maintenance and ease of set-up, the NBS 1001 is constructed of only the highest quality components. With the most heat versus comparable models, and with unequalled customer service, the NBS 1001 is your only choice in continuous band sealers today.

**The NBS 1001 Continuous Band Sealer Offers the following features:**

- Heavy duty construction
- More heat than comparable models
- DC Variable Speed Drive
- Easy band replacement
- Nickel Plated Sealing Head
- Solid State Temperature Control
- Designed for automatic or manual lines
- Carrier belts for bag top control
- Heat and Cool Bars hardened for a longer life
- 220 V single phase
- User Friendly

**OPTIONS**

- Bag Top Trimmer
- Code Date Systems
- Casters
- Stainless Steel Construction
- Special Seal Width
- Nema 4
- Annodized and Stainless Construction
